Experiments for Thesis ...
 Example 1.4.1

Example 1.4.2

Example 1.4.3

Finite Irreducible Coxeter Graphs Figure

Figure 1: Coxeter graphs corresponding to the finite Coxeter groups.

Affine Coxeter Graphs Figure

Figure 2: Coxeter graphs corresponding to the infinite Coxeter groups

FC-finite Coxeter Groups

Figure 3: Coxeter graphs corresponding to the FC-finite Coxeter groups.

Star Reducible Heaps

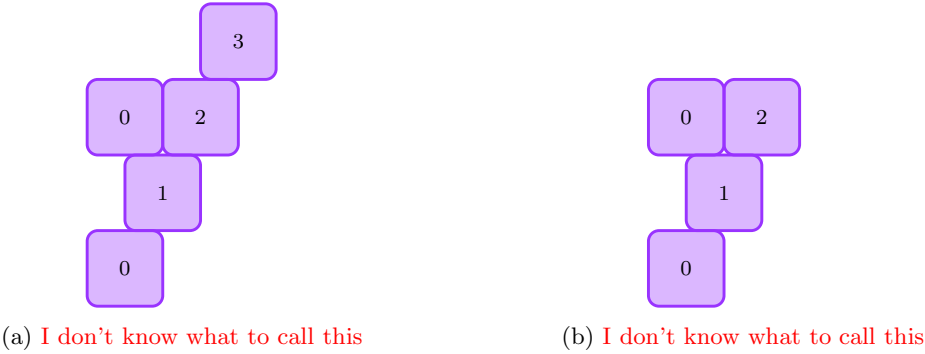

Figure 4: Visualization of Example ??

Weak Star Reducible Heap

Figure 5: I don't know what to call this

Heaps for Property-T Section

(a) Heap of an element with Property-T

(b) Heap of a T-Avoiding element

Figure 6: Heaps of an element with Property-T and a T-Avoiding element

Figure 7: Heap of a non-trivially T-Avoiding element in $W(\tilde{C}_4)$.

Impermissible subheaps for elements in FC groups

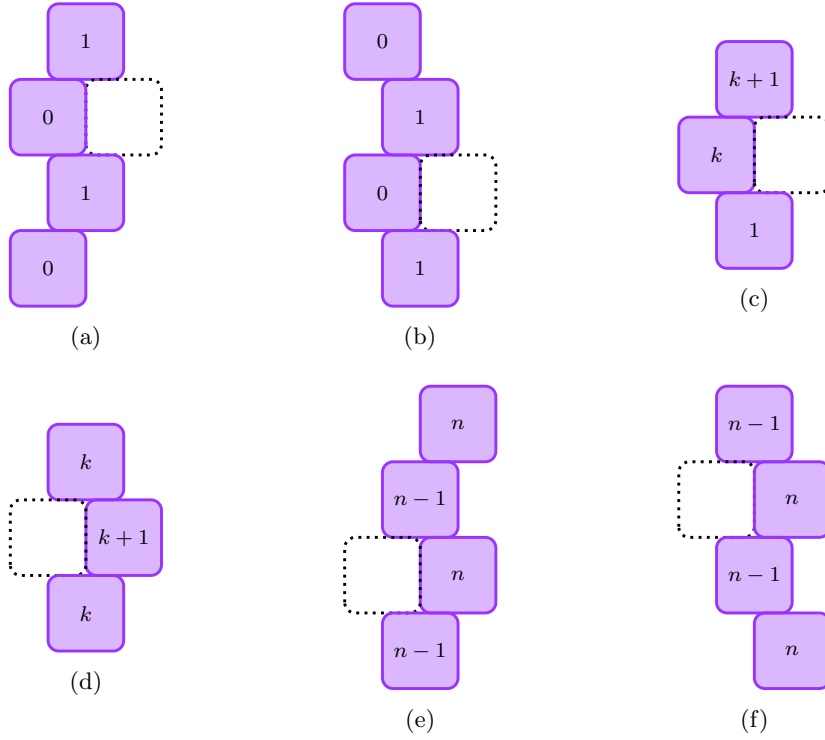

Figure 8: Impermissible subheaps for elements in $FC(\tilde{C}_n)$.

Figure 9: A visual representation of Property T.

Single Bowtie

Figure 10: A single bowtie in $W(F_5)$.

Labeled Coxeter Graphs that the thesis deals with

Figure 11: A stack of bowties in $W(F_5)$.

Figure 12: A non-trivial T-avoiding element in $W(F_6)$

(a) A_n

(b) \tilde{A}_n

(c) B_n

(d) \tilde{C}_n

(e) D_n

(f) F_n

(g) $I_2(m)$

Figure 13: Labeled Coxeter Graphs
